

ARCH MOLDS

performance
health
comfort

LEAN

for low volume footwear where control and support are critical
ie. dress shoes, bike shoes, cleats

Anti-Bacterial Nano-Silver Topsheet

- kills bacteria
- reduces odor

Deep Support Heel Cup

- keeps foot stable inside footwear

Aggressive Arch Support

- prevents arch from collapsing over time

1.2mm Total Thickness

- thin and light to fit almost any shoe

Heat Moldable Sub Layer

- no 2 feet are the same

Instructions

Preheat oven to exactly 225° F

Bake 1 at a time until white tab turns black
*See below

Quickly place Archmold into your shoe

With thick sock stand on insole for 1 minute

The Archmolds Experience:

- Custom Molds to Your Unique Foot
No two feet are the same. Become one with your footwear.
- Reheats 5 Times
As you change footwear, simply repeat the customization process.
- Why Archmolds?
Prevention of: Plantar Fasciitis, Fallen Arches, Heel Spurs, Over Pronation, Fatigue, Bad Foot Hygiene
unprecedented comfort and support
